**Getting you where
you need to be**

Who are we?

Garside Off-Road Support are a reliable and passionate logistics partner, offering a range of services and equipment to help with filming in the roughest of terrains. With a muck in attitude, you can rest assured that whatever the task, weather or location, we can help.

We're a Yorkshire based business that has been founded on the back of 7 years experience in the locations department which allows us to integrate with a variety of teams, making sure that everything you need is catered for. Our friendly team are always there to ensure your cast, crew and kit get to set safely and efficiently.

Our quick access to the M62 and A1 also allows us to service productions nationwide.

What do we do?

We often see locations that are unsuitable for standard technical vehicles and vans. This is where our specialised vehicles, expertise and industry knowledge come in. From cross-loading and transporting kit in trailers to ferrying cast / crew around and even using vehicle space as green rooms, you can rest assured that we are well equipped to help make light of a day filming in all terrains. Whether it's in the muddiest woods, on the sandiest beaches, up a hill, down a dale, or even in tight town centres.

We also offer general logistics and are well versed in towing generators, honeywagons, tower lights and more.

**Smiling, whatever
the weather!**

Our Equipment

4x4 Pickup Trucks

Our single cab and double cab pickups are a heavy duty vehicle for handling any terrain where access width is no problem. With a high towing capacity, they are able to move a variety of trailers, including honeywagons, generators, tower lights and more.

Mid Size 4x4s

Our Midsized 4x4s are a versatile option, capable of towing variety of trailers, as well as carrying cast and crew.

These are not as big as pickups so are a good option for more urban locations too.

Suzuki Jimny

These compact 4x4s are a quiet, lightweight and nimble option capable of towing our trailers and some smaller equipment such as tower lights.

Although not quite as small as a gator, these have proven to get almost anywhere you point them!

Our Equipment

Quad Bikes

Our quad bikes are designed to tread where access is tightest, whilst still being able to tow our trailers full of kit! The versatile and nimble nature of these make them a great option for most locations

These are unable to carry passengers.

Trailers

We have trailers available from 4'x3' - 10'x6'

Our 8' x 5' trailers are our general use ones which can be towed by any of our vehicles and can fit almost anything you will need, including: 3 mag liners, lights, track and more. These can come both covered and uncovered.

Any location, any time.

Our Experience

Over the last 2 years, our reliability and expertise has allowed us to develop strong relationships and support numerous productions up and down the country, including some from:
